

MUBASHIRA EP

Python Developer | AI/ML Engineer | Full-Stack Developer

+91 90720 71443 | epmubashira325@gmail.com | Mannarkkad, Kerala

LinkedIn: <https://www.linkedin.com/in/mubashira-ep> | GitHub: <https://github.com/epmubashira325-bot>

PROFESSIONAL SUMMARY

Python Developer with hands-on experience in AI/ML, backend development, full-stack web applications, REST API development, NLP, and computer vision. Experienced in developing web applications and backend services using Python, Django, Django REST Framework, React.js, Scikitlearn, TensorFlow, OpenCV, and Streamlit. Currently working on REST APIs, authentication, booking management, frontend development, automation, and application debugging in a professional development environment. Skilled in building and integrating practical AI-powered and full-stack solutions for real-world applications.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, HTML, CSS

Backend & APIs: Django, Django REST Framework (DRF), REST API Development, API Integration, Authentication, CRUD Operations, JSON

AI & Machine Learning: Scikit-learn, Pandas, NumPy, Regression, Classification, Feature Engineering, Model Evaluation

Deep Learning & Computer Vision: TensorFlow, OpenCV, CNN, YOLOv8, Object Detection, Facial Emotion Recognition, Real-Time Image/Video Processing

NLP & Generative AI: NLTK, TF-IDF, Sentiment Analysis, Embeddings, Prompt Engineering, Ollama

Web & Application Development: React.js, Streamlit, Full-Stack Application Development **Deployment**

& Tools: Git, GitHub, Gitlab, Google Colab, Jupyter Notebook, VS Code,

Embedded AI Systems: Raspberry Pi 4, Autonomous Navigation, Traffic Sign Detection, Obstacle Detection

EXPERIENCE

Data Science Intern | *Singularis Software Technologies, Kochi, Kerala* | *Onsite* | June 2025

- Developed 3 ML solutions for performance prediction, sentiment analysis, and recommendation using Python, Pandas, NumPy, and Scikit-learn.
- Achieved 92% accuracy in student performance prediction using 12+ engineered features and 1,000+ records.
- Applied NLP, TF-IDF, EDA, preprocessing, feature extraction, and model evaluation across ML projects.

Python Developer | Techfif0 Innovations | Full-Time Internship | July 2026 - present

- Build frontend for a structural engineering company website using React.js and JavaScript, building responsive UI components and improving user experience.
- Worked on a Hotel Residency Booking Software using Python, Django, and Django REST Framework, developing REST APIs for booking, room, guest, and authentication management. Collaborated with frontend and backend teams on feature development and bug fixing.

- Contributed to maintaining and updating the company's official website by implementing content updates and functionality improvements.
- WhatsApp booking automation using Python, Django, and Ngrok, enabling secure local API tunneling and streamlined booking request processing.

PROJECTS

AI-Powered Resume Analyzer

- Built a full-stack resume analysis web app using Python, Django, HTML, CSS, JavaScript, TF-IDF, and NLTK.
- Implemented ATS score prediction, skill-gap analysis, and automated feedback generation

Embedded AI Autonomous Driving Assistant

- Developed an autonomous driving assistant on Raspberry Pi 4 using OpenCV, TensorFlow, YOLOv8, camera modules, and ultrasonic sensors.
- Integrated real-time object detection, traffic sign recognition, and obstacle detection via camera and sensor fusion for environment awareness.
- Incorporated rain-adaptive speed control and intelligent rerouting logic based on sensor readings and live environmental conditions.

AI-Based Nutrition & Health Analyzer

- Engineered a full-stack AI-powered health analysis web application for ingredient analysis and nutritional assessment.
- Designed a recommendation system achieving 90% accuracy in predicting health scores, identifying potential health risks, and generating nutritional insights from food data.

Real-Time Facial Emotion Recognition System

- Constructed a real-time emotion recognition system using TensorFlow, OpenCV, and pretrained CNN models.
- Deployed a live webcam pipeline for face detection, multi-class emotion classification, and real-time inference.

Mini AI Chatbot using Ollama and Streamlit

- Created a Generative AI application using Python, Streamlit, and Ollama for real-time text generation powered by the Llama 3.2 model.
- Leveraged local LLM deployment and prompt engineering techniques to deliver accurate AI-generated responses through an interactive web interface.

EDUCATION

Bachelor of Technology (B.Tech) — Artificial Intelligence and Data Science

Royal College of Engineering and Technology, Kerala | 2022 – 2026

CERTIFICATIONS

- Python Programming for Data Science
- AI Skills Passport – EY
- Introduction to Generative AI and Agents
- Full Stack Web Development with AI Tools – Edunet Foundation

LANGUAGES

English: Professional Proficiency , **Malayalam:** Native Proficiency
